

Reimagining Cloud Services with Cloud Connect from IntelSat

Extend Your Applications Globally and Securely

Eliminate the need to choose between the benefits of the cloud and the security and consistency of a private wide area network. IntelSat Cloud Connect uses the reach and power of IntelSat's high-throughput satellite and ground networks to directly connect users to cloud infrastructure through our private cloud gateways. By connecting users securely to essential cloud-based applications, enterprises can keep users productive and their businesses thriving – regardless of location, whenever they need it most.

Cloud Services With the Speed and Consistency of a Private Network

Cloud Connect adds the security and consistency of Microsoft Azure ExpressRoute to IntelSat's global FlexEnterprise platform. With Cloud Connect and FlexEnterprise, organizations can extend the scalability, reliability, and security of the cloud to customers in almost any region, keeping business moving and users productive across every location.

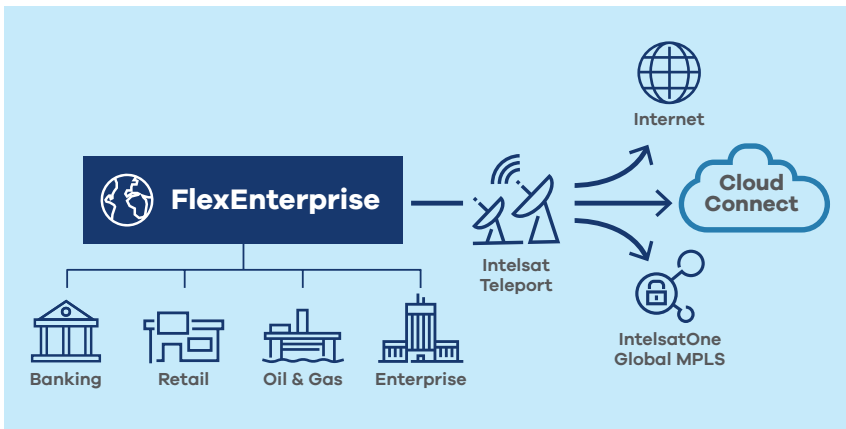

How it Works

Private Network Access. Global Network Reach.

FlexEnterprise customers can now leverage IntelSat as an Azure ExpressRoute Partner to connect end users to their private Azure services as if they were an extension of the users' local, private network – directly and securely. With FlexEnterprise and Cloud Connect, there's no location that can't leverage the power of the cloud.

Benefits At-A-Glance

- Enable customer applications virtually anywhere with global highthroughput Epic capacity
- Reduce capital costs to reach new regions through our managed satellite infrastructure and global terrestrial network
- Combine Cloud Connect with the ability to expand the reach of private networks and enable access to the public internet

Connecting Users in More Ways

Cloud Connect adds another option for FlexEnterprise customers to leverage for delivering global network access. Connect users to the public internet, handoff customer traffic at one of IntelsatOne’s global POP locations, and now extend secure access to the Azure cloud.

Increase the Value of Your Services

Enhance your business offerings by connecting customers to more resources with secure, reliable cloud connectivity. Typical Cloud Connect implementations include:

Banks

Securely deliver finance and database applications to all branches and provide the same services to users regardless of location

Retail

Integrate private “point-of-sale backhaul” and public internet access for converged connectivity and omnichannel requirements

Oil & Gas

Become a core piece of the connectivity puzzle across both enterprise and external partner locations

Give users the consistent, secure cloud experience they demand – contact us today to learn more about Cloud Connect and FlexEnterprise.

About Intelsat

Intelsat’s global team of professionals is focused on providing seamless and secure, satellite-based communications to government, NGO and commercial customers through the company’s next-generation global network and managed services. Bridging the digital divide by operating one of the world’s largest and most advanced satellite fleet and connectivity infrastructures, Intelsat enables people and their tools to speak over oceans, see across continents and listen through the skies to communicate, cooperate and coexist. Since its founding six decades ago, the company has been synonymous with satellite-industry “firsts” in service to its customers and the planet. Leaning on a legacy of innovation and focusing on addressing a new generation of challenges, Intelsat team members now have our sights on the “next firsts” in space as we disrupt the field and lead in the digital transformation of the industry.
