INTELSAT General

FlexAir for Government

An affordable, flexible, high-performance
way to stay connected

Affordable, secure and powerful connectivity for small mobility terminals

Your global data needs are complex and increasingly unpredictable, so it's imperative to have secure, reliable connectivity to accomplish your mission anywhere in the world. With the advent of Intelsat Epic high-throughput satellites, featuring power-concentrated spot beams, small mobility terminals are now able to leverage satellite connectivity at higher data rates than ever before.

Introducing Intelsat FlexAir for Government – a service that provides an affordable, flexible, secure, and powerful way to stay connected. Developed by Intelsat General, FlexAir leverages our Intelsat Epic high-throughput satellite technology which is fully integrated with our existing satellite fleet and global IntelsatOne terrestrial infrastructure. FlexAir offers resiliency and productivity anytime, anywhere, and provides a multitude of benefits in a single powerful platform.

Benefits include:

☐ **Higher performance and efficiency** with lower cost per bit

☐ **Antenna choice flexibility** with a multitude of vetted manufacturers

☐ **High-throughput** optimized for smaller terminals at higher data rates

☐ **Enhanced interference mitigation** due to spot-beam technology, diversity, and our advanced digital payload

.

How will you evolve your communications architecture to benefit from the latest satellite innovations?

Intelsat FlexAir for Government Managed Service Offerings

FlexAir is a global in-flight connectivity service designed for aircraft with high-performance requirements. This service offers:

Global Coverage: a global Ku-band satellite network built around the most advanced HTS technology

Flexible Service Options: multiple service offerings adapted to different applications and requirements

A Range of Antennas: compatible with multiple fuselage and tail mount antennas for rapid deployment

An Ecosystem of Partners: network operations by IGC with end-user care by solution partners, who provide value-added applications and technical expertise
FlexAir Subscription Packages

Our flexible service plans allow you to determine your Quality of Service based on your data rate requirements, mission locations and budget.

| FlexAir Global	FlexAir Global	FlexAir ISR
Pay-as-you-go	**Monthly Subscription**	**Dedicated HTS Capacity for Committed Information Rates**
• Pay-as-you-go costs proportional to data rates delivered	• Subscription-based with monthly data allocation tiers	• From aircraft in 1 Mbps increments up to 6 Mbps
• No term commitment	• Aircraft data rates: HTS spot beam – Up to 15 Mbps to and 3 Mbps from the airframe	• Geographic focus and able to roam to/from the FlexAir Global network
• Aircraft data rates: HTS spot beam – Up to 15 Mbps to and 3 Mbps from the airframe		• Can support multiple SimOps with one subscription
		• For sensor data, video transmission and communications

Range of Antennas

• 12" T-tail Form Factor and 18" Ku/Ka-band antenna options for broad range of aircraft
• Parabolic, flat panel arrays
• Future support for ESAs

Sample Compatible Hardware

Astronics F-310, F-311
GCE BB45/H45 Ku/Ka
Orbit MPT 31
Rantec 18"
TECOM KuStream 1000/1500
ViaSat Ku/Ka2

FlexAir for Government Coverage

■ (green)	Intelsat Epic beams
■ (blue)	Wide beams
■ (gray)	No coverage

About Intelsat General

As the foundational architects of satellite technology, Intelsat operates the world's most trusted satellite telecom network. We apply our unparalleled expertise and global scale to connect people, businesses, governments and communities, no matter how difficult the challenge. Intelsat is building the future of global communications with the world's first hybrid, multi-orbit, software-defined 5G network designed for simple, seamless, and secure coverage precisely when and where our customers most need it.

Follow the leader in global connectivity and "Imagine Here," with us, at **Intelsat.com/intelsatgeneral.**
